Main Areas

As an international innovative smart technology provider, Eastcompeace is committed to providing smart devices, system solutions and services to Telecommunications, Bank & Payments, and Government & Public Sectors. Eastcompeace provides a comprehensive range of innovative and secure products including SIM cards, EMV cards, Device Management System, TSM System, Mobile Payment System, Smart Choice System, BYC³, Smart Tracking System, Smart Parking System and other solutions that will help clients protect the user data, expand new business, and build a more secure and convenient digital society.

Eastcompeace has been recognized as trusted partner for providing secure products and services in all our markets, and this precious trust encourages Eastcompeace to make continuous efforts in the safety and security of individuals, businesses and countries around the world.

Telecommunications :

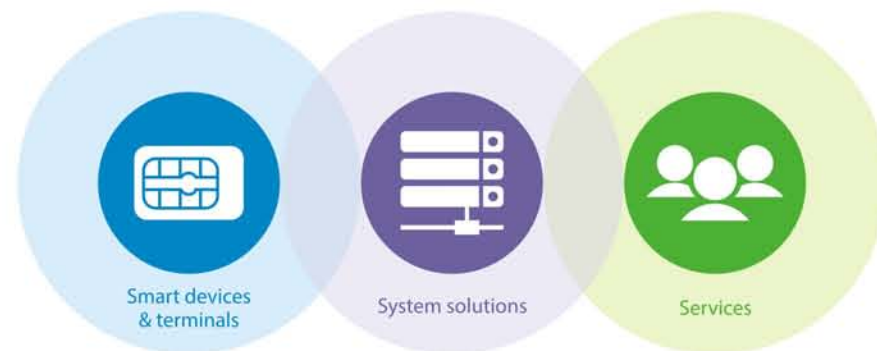

- SIM Card
- NFC
- M2M
- DMS Solution
- TSM System

Bank & Payment :

- Magnetic-stripe Card
- Dual-interface chip Card
- EMV Cards
- COB
- Mobile Payment System

Government & Public Sectors :

- ID Card
- All-in-one Card
- E-Passport
- Smart Parking System

Eastcompeace has assisted above 170 Mobile Network Operators to develop their business with reliable security products and services, which address most fields of MNOs' business: the Eastcompeace SIM (Subscriber Identity Module) cards deliver secure mobile network to millions of users; the Eastcompeace personalized STK application downloading platforms present users various experiences; the Eastcompeace Remote Perso System enables distant users to enjoy a localized service; the Eastcompeace Device Management Service allows subscribers to access the mobile network conveniently.

BYC³ - Build Your Customer Care Center

SIM-Kiosk is a self-service kiosk machine that can be located in customer care lobbies, airports and other applicable places to allow mobile users to recharge the mobile account, to purchase a mobile number, to purchase a new application and etc.

SIMart is a smaller desktop self-service terminal that can be installed in convenience stores, supermarkets, and other needed places; furthermore, when a mobile user walk into any BYC³ hot spot, he/she can login to BYC³ service page automatically to use the mobile phone as a portable self-service customer care center.

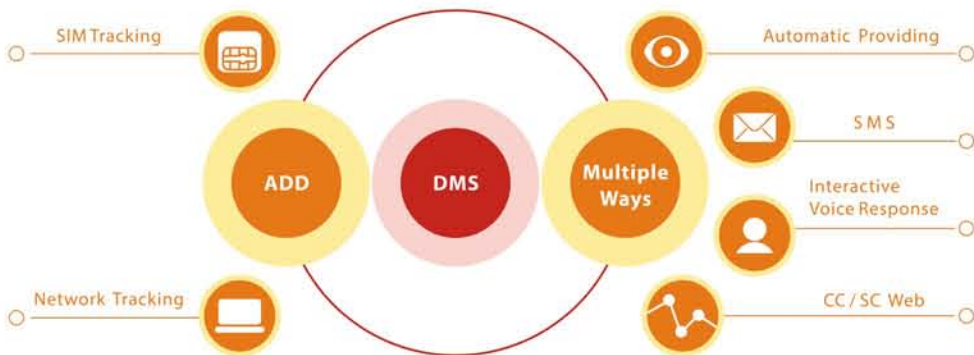

* BYC³ is a comprehensive platform integrating different mobile self-service choices.

Device Management System

Smart Setting - An easy access to Mobile Data Provision

With automatic device detection mechanism, Non-OTA & Chinese handset support solution and campaign management feature, Eastcompeace Smart Setting System simplifies the process and enriches the request ways for device configuration service, which enables subscribers to access mobile data service conveniently and efficiently.

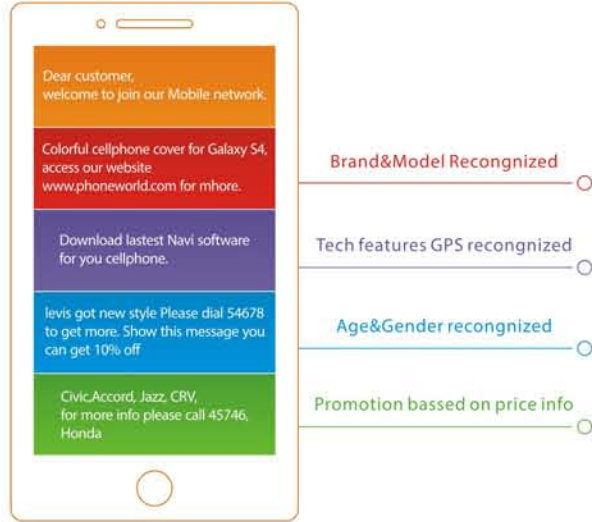

Smart Report - A Valuable Data Mining & Analysis Tool

Smart Report generates valuable statistics which empower MNO to investigate their markets by :

- Segmenting mobile users into groups
- Evaluating an addressable market
- Qualifying investment decisions
- Setting up campaigns to target the right subscribers for new services

Smart ad - Delivering Right Advertisement to Right Customer

Based on the collected info of the handset and the mobile subscriber, an advertisement will be selected and sent to the handset holder. The ad pushing is finished with precise targeting; and therefore the advertising effect will be marvelous.

Smart Choice System - Everyone can have their favorite phone number

Eastcompeace has developed a solution that can provide the ultra personalized service for subscribers – mobile number Smart Choice System.

SCS solution can help mobile users to achieve :

After inserting a newly purchased SIM card into the mobile phone, the subscriber can input the special digits he/she has been looking for; and the SCS back end system will send back a list of mobile numbers which are relevant to the special digits. A subscriber thereby can choose his/her own preferred number.

SCS solution can help operators to achieve :

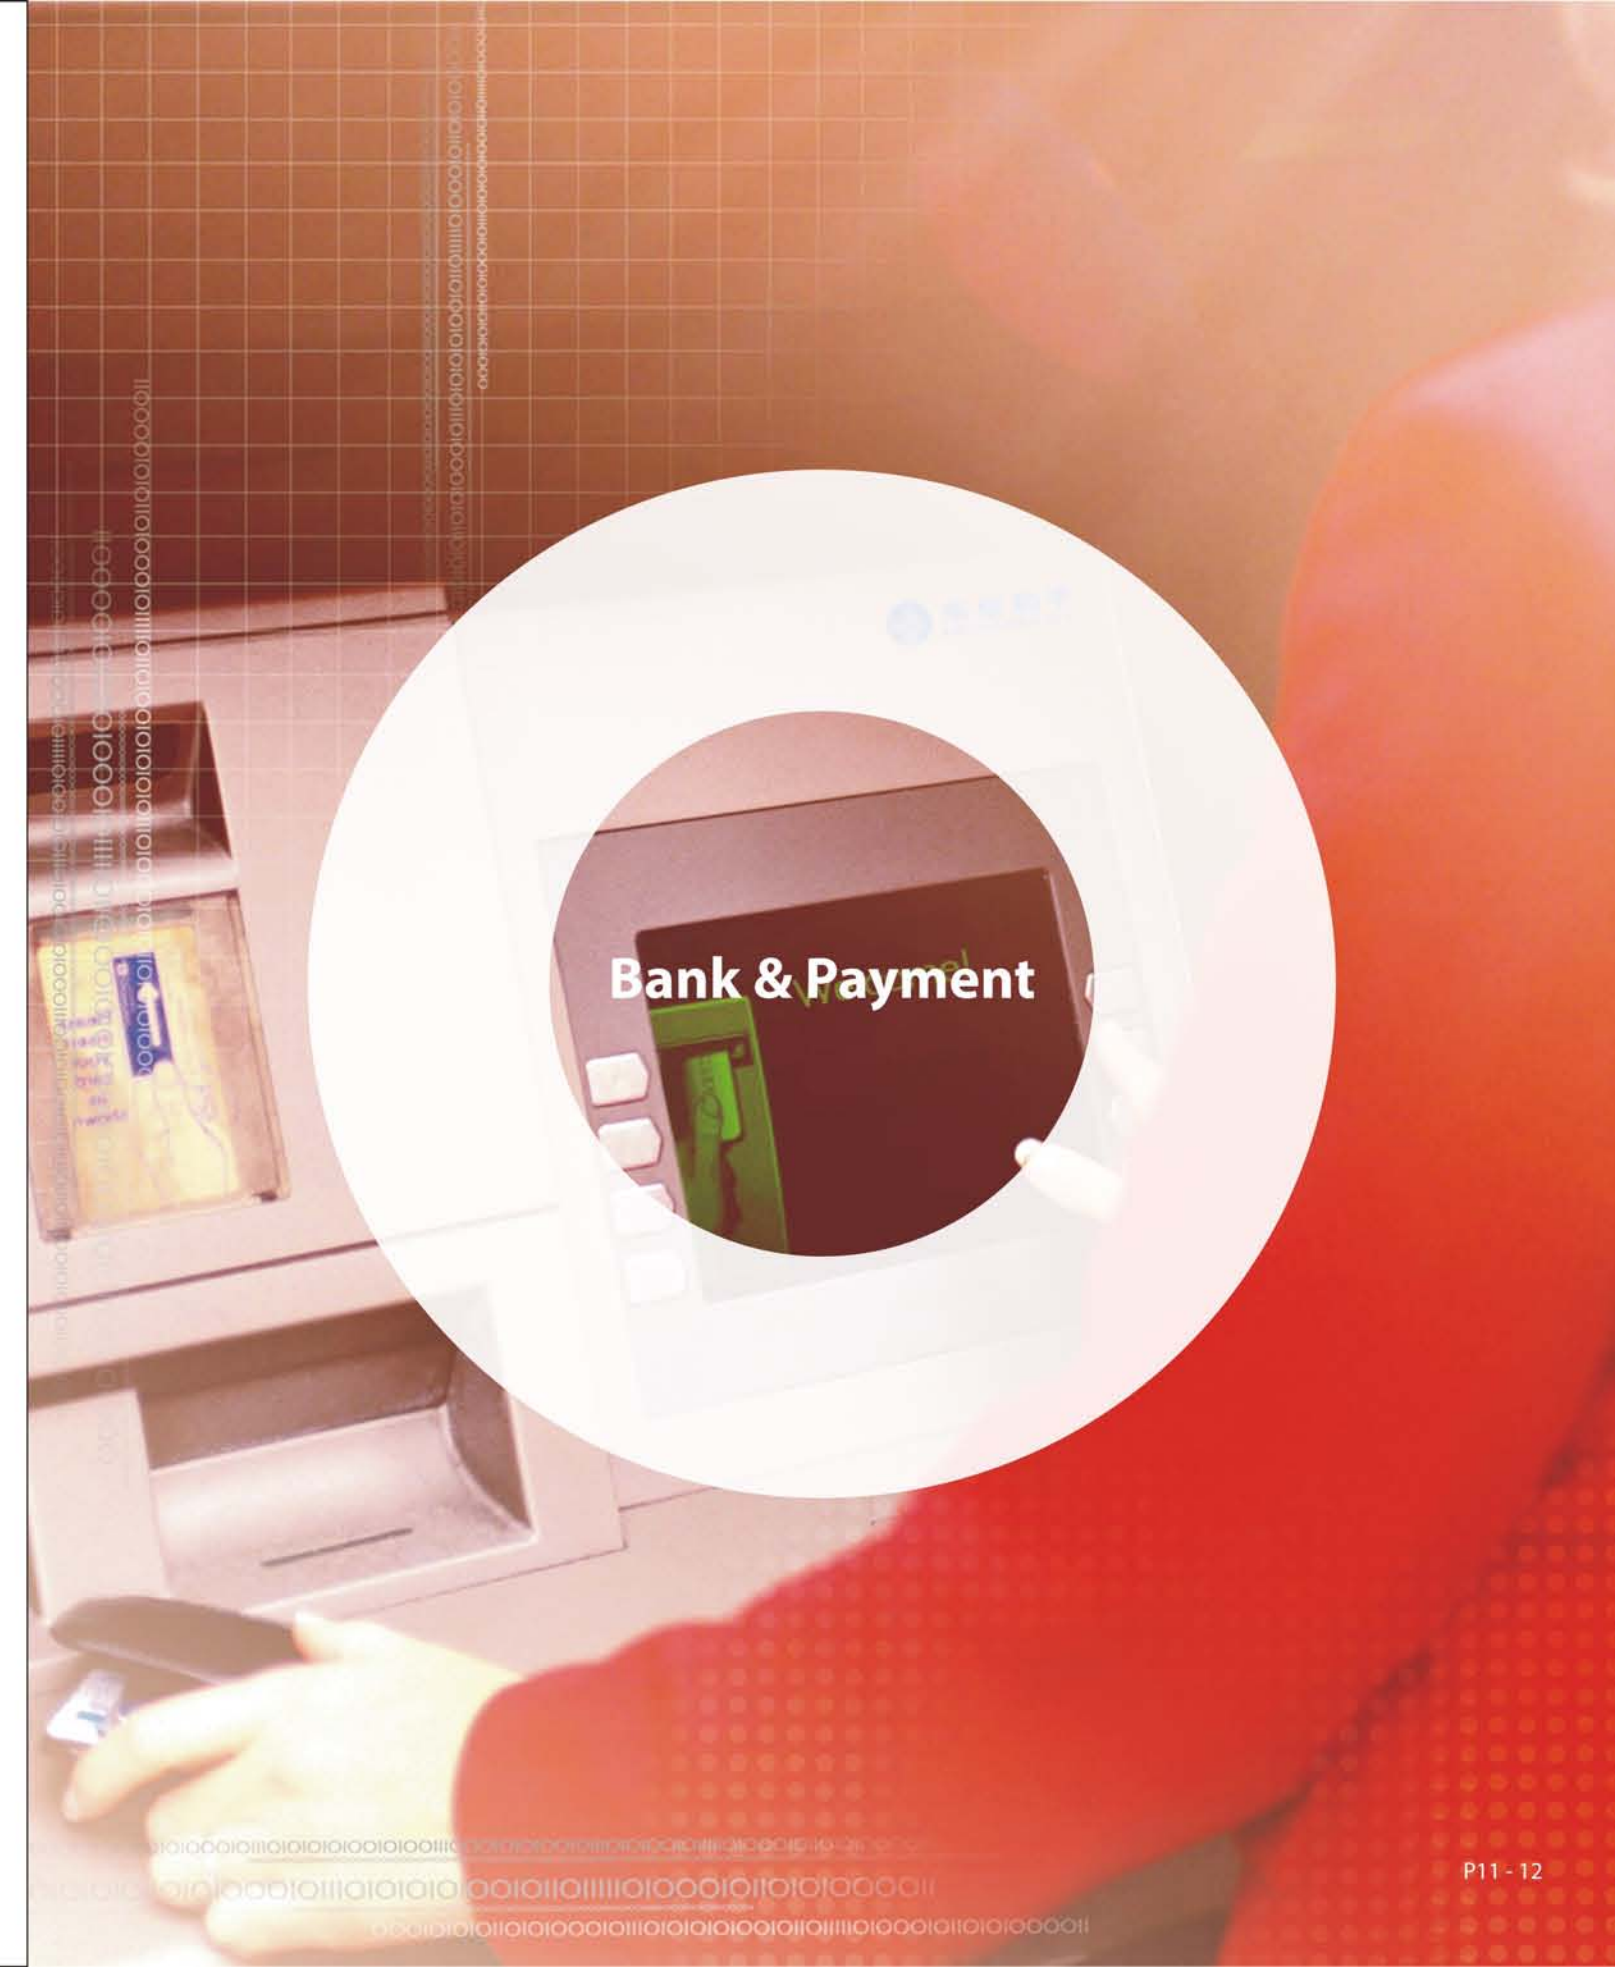

Expand the sales channel of SIM numbers
Reduce the cost by simplifying the supply chain
Increase the loyalty of customers

Smart Tracking System – Your smart guardian

Smart tracking system is developed to protect the safety of children and other needed groups. A STS phone can be located, tracked and fenced from the STS software.

What does it do?

- GPS+LBS location technology - Track the location of phone holders in case of emergency, applicable for children, aged seniors, workers under risky environment, and etc.
- Smart trace playback - Check the daily routes of the phone holder
- Smart emergency call - Assist or rescue the phone holder in time in case of danger
- Smart electronic fence setting – Help to set up a security area for phone holders
- Position report – Review the activity pattern of the phone holder

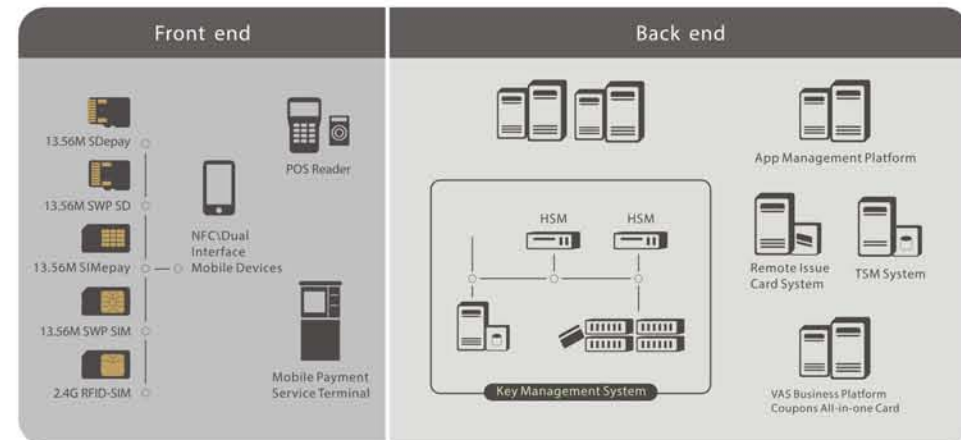

Eastcompeace has been specializing in payment products and technology dedicated to banks and other financial institutions. Eastcompeace payment product portfolio ranges from Magnetic stripe to EMC chip card, EMV devices, contactless technology, innovative card designs and printing techniques, and other services based on smart card technology.

Knowing that payment business is customer-oriented, Eastcompeace builds up a service network in 5 countries in order to respond to customers' demand quickly and support customers' services in time. Eastcompeace strives to provide tailored secure and flexible solutions for customers in the payment industry with the belief to facilitate and secure the payment transactions in modern society.
