4、Twinfood Conventional Refined Canola Oil

Canola oil, known as a specialty in Canada, has been certified by the Heart and Stroke Foundation of Canada and is now the main edible oil in Canada. US FDA recommend people eat canola oil as a daily food oil to as it is one of the most healthy vegetable oils. It contains more unsaturated fatty acid, Vitamin E, and sufficient omega 3, compare to other cooking oils. Twinfood conventional refined canola oil with 3 or 4 liters package is an ideal daily cooking oil for our table. More nutritious and higher smoke point make the oil easily cook in our modern kitchen.

4、Twinfood Quick Oats

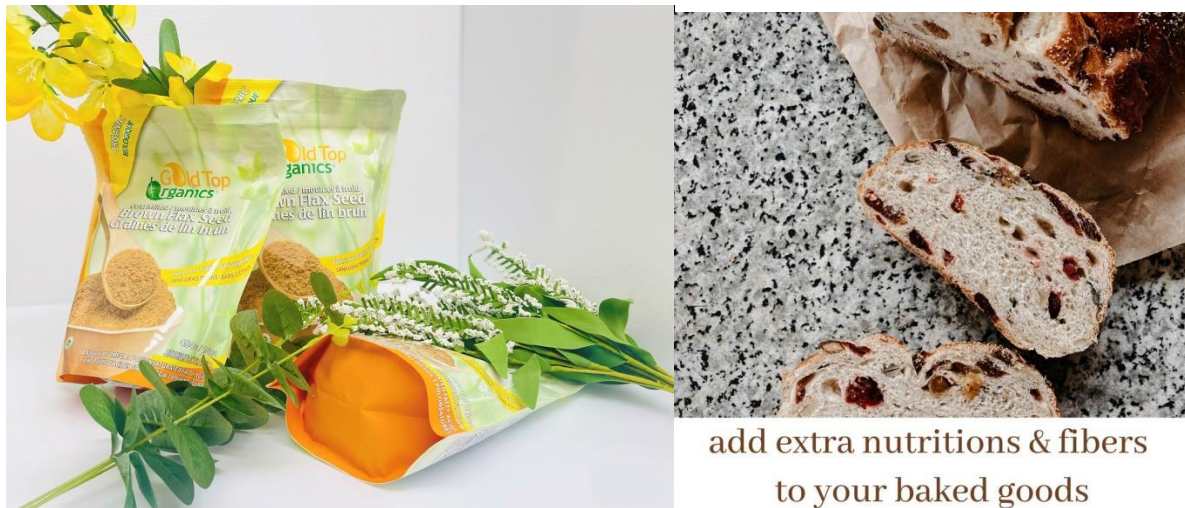

Twinfood Quick Oats produced from Alberta Non-GMO oats. Twinfood has been committed to the production of grain products. The company's factories use high quality management standards. The commitment to product quality is the top priority of TWINFOOD. Alberta is a high-quality production

area for barley, wheat, oats, etc. The soil here is a black land that is very suitable for the growth of wheat and cereals. The soil is rich in trace elements and minerals. The cereals here have long growth period, and they are high in protein content, organically grown, green and non-polluting, which also make Alberta be the best crop producing areas.

5、Twinfood Cold Milled Organic Flaxseed

The history of planting flaxseed in west Canada prairie is over 2000 years, people planted flax to make oil and food with the seeds, also painted flaxseed oil on surface of houses to prevent wood from rot. Resent years, nutrition more and more researchers recommend people use flaxseed as one of the best resource to make food, because flaxseed contains rich of Omega 3, fiber, Vitamin E, and Ligan which not be found in in other plant seeds. Different from most other milled flaxseed, Twinfood cold milled flaxseed is made from all natural and organic flax seeds, and the seeds never be oil-pressed before milling, neither be toasted in high temperature. It directly cold milled in normal temperature and packed immediately, therefore the product remains all natural nutrition stuff inside, and is easy to eat. Twinfood organic mill flaxseed can be made bread and cookies, also the best choice is to easily mix into yogurt and hot or even cold milk to make the best smoothies. The rich fiber and natural protein in flaxseed mill will immediately integrate with the hot or cold drinks into a delicious breakfast smoothie.

6、 Mckenzie Creamed Honey

With more than 150 years of beekeeping history, Alberta is recognized as the “Best Base for Beekeeping in the World” and is recognized as the “The Capital of Honey” in the world. The locals call it “the Capital of Gold Fairy Medicine”. McKenzie's hive is in Three Hills, the beekeeping center in Alberta. McKenzie's honey comes from a sunny steppe in western Canada, which covering thousands of square miles. Natural clover honey is collected from the best environment by the best bees. Siri Hills is at 51 degrees north latitude, close to the Rocky Mountains and less than 100 kilometers away from Banff National Park.

7、 Hernder Estate Icewine

Hernder Icewine is one of the best VQA ice wines in Canada, it is made in the region of Niagara on the Lake, where it is the best region of icewine. Ice wine, also known as the golden liquid, is considered a precious gift from mother nature. Niagara Peninsula, Ontario is the best wine-producing region in Canada. The grapes are then left on the vine until a sustained temperature of minus 8 degrees Celsius or lower is reached. Once the grapes are harvested, they are pressed in small hydraulic presses under much higher pressure than normal for grapes harvested in the regular season. The entire process is natural and non-frozen grapes are used. The ice wine is fermented in the barrels for six months, which gives it a sweet but firm backbone of acidity. Perfectly balanced, not cloying on the palate!

8、Northern Atlantic Wild Sea Cucumber

The wild sea cucumber from Canada is grown 30 miles below the sea level in the northern Atlantic Ocean. It is ice-cold year-round in this area, which causes a longer growth cycle and retains the nutrients and protein in the sea cucumbers. The fishing policy conducted by the Government of Canada stated that it takes 4 to 5 years for the wild sea cucumber to grow and allow it to be caught. This way makes the sea cucumbers full of nutrients and active substances. The slower it grows, the higher the age, the larger it is, the higher the nutrition value is. Canadian Iceberg dried fish maw is sourced from the deep sea of the frigid zone, freshly processed where it's captured. Fish maw, so-called the dried swim bladders of large fish, is known for the richness in gelatine as fish gelatin, bird's nest soup and shark fins. This makes it the well-recognized "ginseng in the sea".
